Journal of Magnetism and Magnetic Materials 133 (1994) xvii–xxiii

journal of magnetism and magnetic materials

Contents

Proceedings of the Eleventh International Conference on Soft Magnetic Materials

Preface xi

Organization, Committees and Sponsors xiii

Dedication: Andrea Ferro Milone xv

Session 1: Basic problems and magnetization processes

Geoffroy, O., J.L. Porteseil
Scaling properties of irreversible magnetization and their consequences on the macroscopic behaviour of soft materials (*Invited paper*) 1

Della Torre, E., F. Vajda, G.R. Kahler
Modeling magnetic materials with the complete moving hysteresis model (*Invited paper*) 6

Humphrey, F.B., M. Redjdal
Domain wall structure in bulk magnetic materials (*Invited paper*) 11

Roth, S.
A two-dimensional model of a ferromagnet with fine grains 16

Sinnecker, J.P., R. Grössinger, R.S. Turtelli, G. Exel, G. Greifeneder, C. Kuß
Quenched-in stresses in amorphous ribbons 20

Gornakov, V.S., V.T. Synogach
Dynamic instability and magnetic after-effect in domain wall dynamics 24

Derebasi, N., T. Meydan
Effect of tension and surface properties on domain wall motion in amorphous materials 28

Hauser, H., P. Fulmek
Simulation of magnetization curves of anisotropic materials 32

Rodríguez, M., A. García, M. Maicas, C. Aroca, E. López, M.C. Sánchez, P. Sánchez
Induction of bistability in low-magnetostriction amorphous ribbons 36

Maksymowicz, A.Z., J.E. Galletly, M.S. Magdoń, I.L. Maksymowicz
Genetic algorithm approach for Ising model 40

Malvicino, C., A. Arri, E. Ansaldi
A particular thermal behaviour of residual magnetism in cast iron 42

Barandiarán, J.M., A. García-Arribas, J. Gutiérrez
Magnetic anisotropy distribution in transverse and obliquely field annealed amorphous ribbons 46

Pfützner, H., J.E.L. Bishop, G. Harasko
A multi-parametric domain model for highly grain-oriented polycrystalline Si–Fe 49

Seeck, St., M. Lambeck
Noncyclic magnetization processes in relation to the Preisach model 53

Morón, C., M. Mora
Magnetization processes simulation in a ferromagnetic Ising model 57

Kolatchevsky, V.V., N.N. Kolatchevsky
Magnetic moment fluctuations in samples with near-to-rectangular hysteresis loops 60

Gannac, Y., J. Degauque, B. Viala, J.P. Redoules
Models of the magnetic behaviour of GO and NO (3.2 wt% Si) and rapidly quenched (6.5 wt% Si) iron–silicon alloys 63

Yu, S.-C., K.-S. Kim, M.-S. Kim, K.-Y. Kim, T.-H. Noh
Spin wave stiffness constants of amorphous Fe–Zr–B–Nb alloys 67

Zysler, R., D. Fiorani, J.L. Dormann, A.M. Testa
Magnetic properties of ultrafine α-Fe_2O_3 antiferromagnetic particles 71

López, E., C. Aroca, M. Maícas, M.C. Sánchez, P. Sánchez
Influence of domain wall stabilization on dynamic losses in amorphous ribbons 74

Astie, B., M. Fagot, C. Beraud, J. Degauque, E. Ferrara, A. Stantero
Observations by Lorentz microscopy of movements

0304-8853/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

of magnetic domain walls in amorphous $Fe_{78}B_{13}Si_9$ alloys 77

Barquín, L.F., J.C.G. Sal, P.D. Babu, S.N. Kaul
Electrical resistivity of Fe–Zr glasses from 4.2 to 1100 K 82

Pokatilov, V.
Local atomic and magnetic structure of microcrystalline Fe–Al alloys 86

Petrillo, C., F. Sacchetti
High-temperature spin density of FeCo: effect of lattice vibrations on the electron distribution 90

Benda, O., J. Bydžovský
Investigation of the influence of annealing on the magnetic properties of Metglas using the Preisach model 93

Lopes Ribeiro, A.
Characterization of soft magnetic materials using a modified Stoner–Wohlfarth model 97

Waeckerlé, T., H. Gavrila, M.C. Marion-Péra
A method of describing magnetic behaviour based on metallurgical features 101

Maraner, A., C. Beatrice, P. Mazzetti
Determination of domain wall surface energy by high-frequency wall mobility measurements in amorphous ribbons 104

Appino, C., F. Fiorillo
Reversible magnetization processes in amorphous alloys 107

Basso, V., M. Lo Bue, A. Magni, G. Ummarino, G. Bertotti
Experimental study and theoretical interpretation of hysteresis loops and Henkel plots in soft magnetic materials 111

Papers presented at the Conference, but not published in these Proceedings:

Khapikov, A.
Solitary waves and non-uniform magnetization processes in a circularly-polarized magnetic field S1-06

Roman, A., J. Szczyglowski
The behaviour of ferromagnetic sheets in alternating electric and magnetic fields S1-18

Zhukov A.P.
Double frequency Matteucci effect in amorphous ribbons S1-21

Malkinski, L., C. Beatrice, G. Durin, M. Müller, M. Kuzminski, Z.I. Kaczkowski
Barkhausen effect investigation of the nanocrystallization process in Fe–B–Si–Cu–Nb alloys S1-33

Session 2: Grain-oriented and non-oriented silicon steels

Nozawa, T., M. Mizogami, H. Mogi, Y. Matsuo
Domain structures and magnetic properties of advanced grain-oriented silicon steel (*Invited paper*) 115

Abbruzzese, G., A. Campopiano
A general theory of secondary recrystallization in grain oriented Fe–Si: Metallurgical parameters controlling the microstructural evolution (*Invited paper*) 123

McQuade, F., A.J. Moses, P.C.Y. Ling
Correlation of internal stress and power loss with domain motion in strip wound magnetic cores 136

Amar, M., R. Kaczmarek, F. Protat
Prediction of power losses in silicon iron sheets under PWM voltage supply 140

Salz, W., K.A. Hempel, M. Mende
Loss separation under elliptically rotating $\boldsymbol{B}$-field with bias field in electrical steel 144

Shimazu, T., M. Shiozaki, K. Kawasaki
Effect of temper rolling on texture formation of semi-processed non-oriented steel 147

Péra, T., T. Waeckerle, F. Ossart
Experimental checking of the coenergy model using a rotating field device 150

Nakamura, Y., Y. Okazaki, J. Harase, N. Takahashi
The dc and ac magnetic properties of a high-purity grain-oriented iron sheet 153

Marion-Péra, M.C., A. Kedous-Lebouc, B. Cornut, P. Brissonneau
Evaluation of intralaminar losses in magnetic cores 156

Mekhiche, M., T. Waeckerlé, B. Cornut
Influence of low Al content on anomalous growth in 3% Si–Fe magnetic sheets 159

Komatsubara, M., Y. Hayakawa, M. Kawano
Effect of grain orientation on magnetic properties in secondary recrystallized 3% Si steel 163

Snell, D., P. Beckley
Domain refinement of high-permeabilty grain-oriented electrical steel using low-friction ball units 167

Mager, S., J. Wieting
Influence of the hot rolling conditions on texture formation in Fe–Si sheets 170

Saito, A., S. Murashige, Y. Uehara
Two-dimensional stress–magnetization effects of grain-oriented silicon steel sheets 174

Weidenfeller, B., W. Riehemann
Frequency dependence of loss-improvement of grain oriented silicon steels by laser scribing 177

Kedous-Lebouc, A., S. Errard, B. Cornut, P. Brissonneau
Magnetic loss and $B(H)$ behaviour of non-oriented electrical sheets under a trapezoidal exciting field 180

Booth, T., H. Pfützner
Characteristics of transformer core materials for flux normal to the sheet plane 183

Yamaji, T., M. Abe, Y. Takada, K. Okada, T. Hiratani
Magnetic properties and workability of 6.5% silicon steel sheet manufactured in continuous CVD siliconizing line 187

Ames, S.L., J.G. Benford
Goss grains originating from mid-thickness in single-staged high-permeability electrical steel 190

Waeckerlé, T., M. Mekhiche, C. Brun
Improvement of magnetic permeability in pure iron sheets 195

Arai, K.I., Y.H. Kim, M. Yamaguchi, K. Ishiyama
Eddy current losses and number of domain walls with respect to total number of layers for very thin 3% Si–Fe strip-wound cores 198

Tanaka, T., H. Yashiki, S. Takada, T. Sasaki
Effect of metallurgical factors on the magnetic properties of non-oriented electrical steels under PWM excitation 201

Crottier-Combe, S., S. Audisio, J. Degauque, B. Viala
Siliconization and aluminization up to 6.5 wt% of iron sheets: evolution of magnetomechanical and magnetic properties 205

Enokizono, M., S. Kanao, K. Yuki
Permeability tensor of grain-oriented silicon steel sheet 209

Enokizono, M., S. Kanao, S. Kawano
Two-dimensional magnetic properties of silicon steel sheet subjected to an alternating field 212

Fortunati, S.
On the metallurgical control of texture sharpness and related magnetic properties in grain-oriented silicon–iron 216

Rosypal, F.
Decarburization annealing of grain-oriented silicon steel with AlN as inhibitor 220

Eloot, K., J. Dilewijns, C. Standaert, B.C. De Cooman
Evaluation of the susceptibility of an electrical steel to magnetic aging using a new internal friction technique 223

Takada, S., T. Sasaki
Magnetostrictions of electrical iron sheets under controlled magnetization 226

Jenko, M., F. Vodopivec, B. Praček, M. Godec, D. Steiner
AES studies of antimony surface segregation in non-oriented silicon steel 229

Papers presented at the Conference, but not published in these Proceedings:

Slama, J., V. Jancarik, E. Usak
Lamination coupling due to stray fields S2-22

Enokizono, M., S. Kanao, G. Shirakawa
Measurement of two-dimensional dynamic magnetostriction under rotating field S2-27

Ban, G., P.E. Di Nunzio, G. Abbruzzese
Induction dependence in the statistical model of power losses of 3.2% SiFe electrical steels: grain-oriented materials S2-28

Session 3: Rapidly solidified materials

Arai, K.I., K. Ishiyama
Recent developments of new soft magnetic materials (*Invited paper*) 233

Lachowicz, H.K., A. Ślawska-Waniewska
Coexistence of various magnetic phases in nanocrystalline Fe-based metallic glasses (*Invited paper*) 238

Allia, P., M. Baricco, M. Knobel, P. Tiberto, F. Vinai
Soft nanocrystalline ferromagnetic alloys with improved ductility obtained through dc Joule heating of amorphous ribbons (*Invited paper*) 243

Herzer, G.
Magnetic field-induced anisotropy in nanocrystalline Fe–Cu–Nb–Si–B alloys 248

van Oudenaarden, A., M. de Jong, J. Sietsma, M.Th. Rekveldt, A. van den Beukel
Internal stress distribution in amorphous $Fe_{40}Ni_{40}B_{20}$ studied by field dependent neutron depolarization 251

Knobel, M., J.P. Sinnecker, J.F. Saenger, R.S. Turtelli
Initial magnetic permeability during the development of the nanocrystalline state in amorphous ribbons 255

Bordin, G., G. Buttino, A. Cecchetti, M. Poppi
Influence of the chemical etching on magnetic and electric properties of Co-rich amorphous sheets 259

Gawior, W., L.J. Maksymowicz, W. Malec
Irreversible relaxation processes in amorphous $Co_{71.5}Fe_{2.5}Mn_2Mo_1Si_9B_{14}$ ribbons 262

Kaczkowski, Z., É. Kisdi-Koszó, L. Potocký
Magnetomechanical coupling in $Fe_{81.5}Cr_{4.5}B_{14}$ metallic glasses produced in a magnetic field 266

Sinnecker, J.P., M. Knobel, R. Grössinger, R.S. Turtelli
Coercivity and disaccommodation on amorphous $(Fe_{1-x}R_x)_{80}B_{20}$ 270

Fujikura, M., T. Yamada, T. Sato
High saturation magnetic induction amorphous Fe–Si–B alloys with improved thermal stability by addition of tin 273

Kisdi-Koszó, É., É. Zsoldos, G. Radnóczi, L.K. Varga, A. Lovas, J. Kovác
Relaxation, cluster formation or precrystallization in amorphous alloys 276

Varga, L.K., É. Bakos, É. Kisdi-Koszó, É. Zsoldos, L.F. Kiss
Time and temperature dependence of nanocrystalline structure formation in a Finemet-type amorphous alloy 280

Kim, K.-S., S.-C. Yu, S.-K. Oh, Y.-S. Cho, T.-K. Kim
Thermomagnetic properties and spin-wave excitation of the nanocrystalline $Fe_{68.5}Co_5Mo_3Cu_1Si_{13.5}B_9$ alloy 283

Wittwer, C., W. Riehemann, W. Heye
Dynamic losses in nanocrystalline finemet for various annealing temperatures 287

Gupta, A., N. Bhagat, G. Principi, A. Hernando
Formation of nanocrystalline phases by crystallization of metallic glasses 291

Fiorani, D., F. Malizia, F. Ronconi, A.M. Testa
Magnetic properties of $Fe_{80}B_{20}$ alloy with nanocrystalline structures 295

Bigot, J., N. Lecaude, J.C. Perron, C. Milan, C. Ramiarinjaona, J.F. Rialland
Influence of annealing conditions on nanocrystallization and magnetic properties in $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$ alloy 299

Schaefer, M., G. Dietzmann
Magnetic properties of as-cast and nanocrystallized $Fe_{74.5}Cu_{0.75}Nb_{2.25}Si_{13.5}B_9$ amorphous ribbons 303

Navarro, I., A. Hernando
Magnetic and structural properties of nanocrystalline $Fe_{77}B_{19}Cu_1Nb_3$ alloy 306

Kulik, T., A. Hernando, M. Vazquez
Correlation between structure and the magnetic properties of amorphous and nanocrystalline $Fe_{73.5}Cu_1Nb_3Si_{22.5-x}B_x$ alloys 310

El Ghannami, M., T. Kulik, A. Hernando, L. Fernández Barquín, J.C. Gómez Sal, P. Gorria, J.M. Barandiarán
Influence of the preparation conditions on the magnetic properties and electrical resistivity of $Fe_{73.5}Nb_3Cu_1Si_{13.5}B_9$ nanocrystalline alloys 314

Altoé, M.V.P., M.S. Lancarotte, R. Cohen, M. Emura, F.P. Missell
Magnetic properties of rapidly quenched iron-based alloys 317

Kolano, R., M. Kuźmiński, W. Gawior, N. Wójcik
Induced transverse magnetic anisotropy and domain structure in Co-based amorphous ribbons 321

Chiriac, H., F. Barariu, Gh. Pop
On the magnetic properties of amorphous FeSiB and FeSiBC wires 325

Makino, A., K. Suzuki, A. Inoue, Y. Hirotsu, T. Masumoto
Magnetic properties and microstructure of nanocrystalline bcc Fe–M–B (M = Zr, Hf, Nb) alloys 329

Kiss, L.F., A. Böhönyey, A. Lovas
Determination of reversible Curie point relaxation spectra in Fe–B metallic glasses 334

Tejedor, M., B. Hernando, M.L. Sánchez
Reversible permeability for perpendicularly superposed induction in metallic glasses for fluxgate sensors 338

Tejedor, M., J.A. García, J. Carrizo
Anisotropy and roughness in as-quenched $Co_{66}Si_{16}B_{12}Fe_4Mo_2$ amorphous ribbons 342

Yu, X., B. Quan, K. Narita
Magnetic properties of flash annealed Fe-based amorphous cores 344

Zbroszczyk, J., W. Ciurzyńska, B. Wysłocki, S. Szymura, J. Olszewski, J. Świerczek, J. Rasek, K. Narita
Grain orientation and low magnetic field properties of microcrystalline Fe–Si ribbons 347

Ciurzyńska, W., J. Zbroszczyk, J. Olszewski, J. Frąckowiak, K. Narita
Order–disorder effect on magnetic properties of rapidly quenched Fe–6.5%Si alloy 351

Makarov, V.A., S.G. Zaichenko, A.I. Zaitsev, V.M. Kachalov
Structure, stresses and magnetic properties of iron-based amorphous alloys with phosphorus after heat treatment giving rise to surface crystallization 354

Bonetti, E., L. Del Bianco, G. Valdrè, P. Allia, M. Baricco, P. Tiberto, F. Vinai
Mechanical spectroscopy and analytical TEM of structural transformation in the $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$ alloy 357

Ramanan, V.R.V., M. Pasquale, G. Bertotti
The influence of microstructure on power losses in Fe–B–Si metallic glasses 362

Ferrara, E., F. Fiorillo, M. Pasquale, A. Stantero, M. Baricco, J. Degauque, M. Fagot, B. Viala, E. du Trémolet de Lacheisserie, J.L. Porteseil
Role of material purity on the structural and magnetic properties of rapidly solidified FeSi 6.5 wt% alloys 366

Papers presented at the Conference, but not published in these Proceedings:

Aronin, A., G. Abrosimova, V.A. Stelmukh
Amorphous Fe–B decomposition above and below T_g temperature S3-24

Yamashiro, Y., T. Yokota, A. Yonesu
Annealing conditions for the maximum magneto-mechanical coupling factor and ΔE effect in 13% Al–Fe splat-cooled ribbons S3-36

Pott-Langemeyer, M., W. Riehemann
Dependence of dynamic losses upon the thickness of rapidly solidified FeSi-6.5 ribbons S3-41

Müller, M., W. Mattern
The influence of refractory element additions on the crystallization and on the magnetic properties of nanocrystalline soft magnetic FeBSiCuNb alloys S3-43

Session 4: Measuring techniques

Drake, A.E.
Traceable magnetic measurements (*Invited paper*) 371

Nakata, T., N. Takahashi, K. Fujiwara, M. Nakano
Numerical analysis of flux distributions in cores made of anisotropic materials (*Invited paper*) 377

Tamura, Y., Y. Ishihara, T. Todaka
Measurement of magnetic characteristics of silicon steel in any direction by RSST and SST: method and relationship 382

Shahvarooghi, A., A.J. Moses
High-speed computerised dc magnetisation and demagnetisation of mild steel 386

Sievert, J.
Determination of the density of magnetic sheet steel using strip and sheet specimens 390

Birkfeld, M., K.A. Hempel
A device for measuring the magnetic properties of ring specimens at high frequencies 393

Marion-Péra, M.C., A. Kedous-Lebouc, B. Cornut, P. Brissonneau
Analysis and comparison of magnetic sheet insulation tests 396

Havlíček, V., I. Zemánek
On-line ac magnetic measurements accuracy 399

Taylor, R.
The electronic detection of fine grain in large grained electrical steels 402

Mivehchi, E., D.H. Horrocks, H. Iranmanesh, P. Beckley
Domain wall speed measurement of Si–Fe samples at 50 Hz magnetisation from dynamic SEM images 405

Harasko, G., H. Pfützner, K. Futschik
On the effectiveness of magnetotactic bacteria for visualizations of magnetic domains 409

Fessant, A., J. Gieraltowski, J. Loaec, D. Spenato, H.L. Gall
A broad-band method for measuring the complex permeability of thin soft magnetic films 413

Nakata, T., N. Takahashi, K. Fujiwara, M. Nakano
Study of horizontal-type single sheet testers 416

D'Orazio, F., F. Giammaria, F. Lucari
Multiple reflection phenomena in magneto-optical studies of thick samples 419

Matteucci, G., M. Muccini, U. Hartmann
Stray-field investigations on sharp ferromagnetic tips by electron holography 422

Didosyan, Y.S.
Measurements of domain wall velocity by the dark field method 425

Novikov, A., N. Stroyev, K. Stroyev, A. Shiriayev
PC-controlled complex for measuring parameters of soft magnetic materials at frequencies as high as 5 MHz 429

Baholo, B., P.H. Mellor, D. Howe, T.S. Birch
An automated calorimetric method of loss measurement in electrical machines 433

Ahlers, H.
Precision calibration procedure for magnetic loss testers using a digital two-channel function generator 437

Shirkoohi, G.H., A.J. Moses
Anisotropic dependence of hysteresis and eddy current components of iron loss in non-oriented steels 440

Shirkoohi, G.H., M. Boukhalfa
Effect of stress on deviation of the in-plane flux from the longitudinal direction in single strip testers 443

Yamamoto, T., S. Takada, T. Sasaki
Estimation of measuring error in digital dc fluxmeters 446

Takada, S., F. Tokutake, T. Sasaki
Magnetic losses in amorphous ribbons excited with symmetrical and asymmetrical rectangular voltages 450

Papers presented at the Conference, but not published in these Proceedings:

Hribernik, B., V. Gorican, A. Hamler, B. Kreca
Experience with small single sheet tester S4-04

Zazo, M., L. Torres, J. Iniguez, J.M. Munoz and C. De Francisco
Automatic system for measuring magnetic relaxation in superconducting samples based on a simple inductive technique S4-05

Salz, W., K.A. Hempel, A. Steffens
Waveform control for a two-dimensional measuring equipment using adaptive digital state control S4-09

Nakata, T., N. Takahashi, M. Nakano
Measurement of magnetostriction using laser doppler velocimeter with good reproducibility S4-16

Nemeth, S., L. Papp, L. Szabo, F. Gyurika
Field, induction and loss measurements in DST-tester and Epstein frame S4-17

Babare, A., G. Scendrate, S. Crepaz, M. Ubaldini
Considerations on theory, design and operation of saturable reactors in large ac to dc convertors S4-26

Session 5: FeNi, FeCo, soft ferrites, thin films, multilayers

Krishnan, R., H. Lassri
Magnetic and magneto-optical properties of Co–Ni/Pt multilayers (*Invited paper*) 453

Godinho, M., A. Carvalho, M. Noguès, J.L. Dormann, M. Seqqat
Field and temperature dependence of magnetic viscosity in randomly canted Li–Ti ferrite 457

Sugimoto, M.
Amorphous characteristics in spinel ferrites containing glassy oxides 460

Candolfo, D., F. Malizia, F. Ronconi, G. Zini
Magnetization of pressureless sintered Fe–B powders 463

Kaczmarek, R., M. Dautain
Measurements of the local hysteresis loop on soft polycrystalline ferrites by the longitudinal Kerr effect 466

Boubeker, B., J.P. Eymery, M.F. Denanot, E.L.H. Sayouty
A TEM and CEMS study of bcc Fe–Ni–Cr thin films 470

Rossi, S.D., G. Cappio, G. Chiaia, F. Ciccacci
Spin-resolved inverse photoemission from Fe films epitaxially grown on Ag(100) 474

Liu, C.S., J.M. Wu, C.J. Chen, M.J. Tung
Power loss properties of Mn–Zn ferrites containing Er_2O_3 478

Neamtu, J., V. Spinu, G. Filoti
Magnetic and Mössbauer studies of Ti^{4+}-substituted soft Mn–Zn ferrites 481

Lubecka, M., L.J. Maksymowicz, R. Szymczak
Magnetic behavior of the spin glass state in $CdCr_{2x}In_{2-2x}Se_4$ thin films 484

Inaba, H., T. Abe, Y. Kitano, J. Shimomura
Magnetic properties and the grain boundary structure of Mn–Zn ferrites with the addition of Nb_2O_5 487

Zuberek, R., H. Szymczak, R. Krishnan, M. Tessier
Influence of interdiffusion layer on magnetostriction of Fe/CoNbZr multilayers 490

Pain, P., J.P. Eymery, M. Cahoreau, M.F. Denanot, J.F. Dinhut
Structural and magnetic properties of Fe–Co thin films elaborated by ion-beam sputtering 493

Dinduns, S.S., U.A. Ulmanis, A.S. Smirnov
Magnetic manifestations of cation redistribution in ferrites 497

Yamamoto, Y., A. Makino
Core losses and magnetic properties of Mn–Zn ferrites with fine grain sizes 500

Carbucicchio, M., G. Palombarini, R. Bertoncello, A. Glisenti, E. Tondello, G. Sberveglieri, S. Groppelli
A study of sputtered Fe–Al multilayers and their stability at 400 K in an oxidizing atmosphere 504

Lin, J.C., L.J. Chen, C.J. Chen, J.L. Chen
Study on the interface of ferrite/Sendust film 508

Zangari, G., B. Bozzini, P.L. Cavallotti, G. Fontana, P.G. Maisto, E. Terrenzio
Coercivity and microstructure in Co–Pt and Co–Pd thin films 511

Fukunaga, H., H. Abe, Y. Ohta, H. Kakehashi
Evaluation of magnetization models for simultaneous analysis of flux and temperature distributions in ferrite cores 516

Papers presented at the Conference, but not published in these Proceedings:

Heiden, C.
High T_c SQUID magnetometry (*Invited paper*) S5-02

Tung, M.J., T.Y. Tseng, W.C. Chang, C.S. Liu, C.J. Chen
Effect of grain boundary capacitance on the core loss of Mn–Zn ferrite in MHz frequency S5-21

Le Gall, H., A. Rakii, J. Gieraltowski, J. Loaec
Origin of the residual coercivity in ultrasoft amorphous Co–Zr films S5-23

Session 6: Modelling of magnetic circuits and applications

Mykolaitis, H.
Cyclic magnetization noise of nonlinear ferromagnetic cores (*Invited paper*) 520

Meydan, T.
Application of amorphous materials to sensors (*Invited paper*) 525

Chiricozzi, E., F. Parasiliti, M. Villani, G. Vigliaturo, R. Gubiotti
Electrical steels for high-efficiency motors 533

Fard, S.M.B., A.J. Moses
A method of modelling the anisotropy of electrotechnical steels in the finite element method 536

Philips, D., L. Dupré, J. Cnops, J. Melkebeek
The application of the Preisach model in magnetodynamics: theoretical and practical aspects 540

Kozłowski, M., M. Pietruszka
Quasi 3-D magnetic field computation for the layer structure of transformer cores 544

Rosenson, A.E., S.A. Shekh
Finite element modelling of magnets for nuclear magnetic resonance 547

Goktepe, M., T. Meydan
Influence of bending stress on flux distribution in toroidal transducers 550

Nencib, N., A. Kedous-Lebouc, B. Cornut
3D analysis of a rotational loss tester with vertical yokes 553

Delincé, F., A. Nicolet, W. Legros, A. Genon
Analysis of ferroresonance with a finite element method taking hysteresis into account 557

Löffler, F., H. Pfützner, T. Booth, C. Bengtsson, K. Gramm
Influence of overlap length in stacked transformer cores consisting of several packages 561

Basak, A., C.H. Yu, G. Lloyd
Core loss computation of a 1000 kVA distribution transformer 564

Enokizono, M., Y. Midou
Moving simulation of magnetic domain structure in grain-oriented silicon steel sheet 568

Enokizono, M., T. Todaka, T. Maeda
Inverse analysis with neural networks 571

Ramos, H.G., A.L. Ribeiro, P.S. Girão
A two-dimensional vector model of ferromagnetic hysteresis 574

Atallah, K., D. Howe
The calculation of iron losses in brushless permanent magnet dc motors 578

Basak, A., A. Matsumura, J. Kaczmarek, G. Lloyd
Computation of flux and force in an $SmCo_5$ dc linear motor with U-spring supports 583

Shirkoohi, G.H., A.S. Kontopoulos
Computation of magnetic field in Rogowski–Chattock potentiometer (RCP) compensated magnetic testers 587

Chiampi, M., D. Chiarabaglio, M. Repetto
An accurate investigation on numerical methods for nonlinear magnetic field problems 591

Bobbio, S., G. Miano, L. Verolino, C. Visone, E. Zamparelli
Applications of a new model of scalar hysteresis to a series ferroresonant circuit 596

Enokizono, M., A. Nishimizu
Effect of thermal fatigue on Barkhausen noise 599

Battistini, L., R. Benasciutti, A. Tassi
Effects of heat treatment on crystallographic and magnetic properties of magnetic steels 603

Valkovic, Z.
Effect of electrical steel grade on transformer core audible noise 607

Morón, C., E. Suárez
Non-contact digital speed sensor 610

Donzella, G., S. Granzotto
Some experimental results about the correlation between Barkhausen noise and the fatigue life of steel specimens 613

Nafalski, A., D.C. Frost
Study of an amorphous alloy core transformer 617

Groniecki, P., C.L. Ramiarinjaona, J.F. Rialland
Predetermination of the magnetic characteristics of stacked ferromagnetic sheets 621

Goleman, R.
A high-speed induction motor making use of the third harmonic of the magnetic flux 624

Saito, A., K. Kuwata, K. Yamamoto
Application of amorphous ribbon as a stress sensor 627

Wac-Włodarczyk, A.
A magnetic frequency nontupler supplied with increased frequency 630

Nakesch, H., H. Pfützner
Magnetostrictive amorphous sensor for the detection of human respiration 634

Moses, A.J., M. Yasin, M. Soiński
Evaluation of novel transformer cores 637

Basak, A., A.F.F. Filho
The design and analysis of a novel brushless dc linear motor 640

Shirkoohi, G.H., A.M. Yahya
Localised flux and iron loss in the tooth tip region of a three-phase induction machine stator core 644

Bertotti, G., A. Canova, M. Chiampi, D. Chiarabaglio, F. Fiorillo, A.M. Rietto
Core loss prediction combining physical models with numerical field analysis 647

Papers presented at the Conference, but not published in these Proceedings:

Basak, A., Y. Kano, K. Maeda
Computational design of solenoids with uniform thrust S6-12

Fornacon, K.-H., M. Müller, I. Fischer
A magnetic sensor on the basis of $Fe–Ni_{80}–Mo_6$ alloy for magnetic field measurements in space S6-39
